“Dedicated to you and your workplace safety”

**PRODUCT SUBSTITUTION**

PACCON endeavours to have enough stock on hand to meet our client's orders, however sometimes we, and our suppliers, run out of some items. If this occurs, and with consultation with you, we will offer you an equivalent substitute item. If there is a price difference you will be advised, please note you are under no obligation to accept the substitute product.

**EMBROIDERY**

We cannot accept returns of embroidered clothing or branded items unless PACCON has made an error in colour, sizing or the item is different from your order.

**RETURNS POLICY**

Standard stock items returned in "as new" condition with all packaging and tags intact can be returned for a credit within 30 days. Items purchased specifically for your company, either as samples or for use, can only be returned for a credit if this has been negotiated in advance with our team. If we are unable to sell the item to another customer or return it to our suppliers for a credit, we will be unable to provide a customer credit. Freight charges will not be refunded unless an error has been made by the PACCON team.

**PRICING**

PACCON endeavours to keep pricing competitive and consistent. Unfortunately we, and our suppliers do need to change our pricing when market conditions change. PACCON reserves the right to change pricing without notice. Please talk to your PACCON representative if you have any pricing concerns.

### ABOUT US

PACCON Safety has been operating since 2005. We are a New Zealand owned and operated safety clothing and equipment specialist company.

Our large customer base is made up of businesses both large and small, from across New Zealand, many of whom have supported us for 15 years.

We aim to provide cost effective safety solutions using our wide range of brands and with our extensive stock held in our warehouse.

We pride ourselves on exceptional service, prompt deliveries and amazing flexibility.

We have a dedicated and highly trained team of safety specialists covering the country who provide advice and recommendations to find the right solution for your business. Our team can provide training, education and can attend "toolbox" meetings as required.

We welcome the opportunity to quote, or simply provide advice, for your safety needs no matter how difficult.

“Dedicated to you and your workplace safety”

## **HARD HAT BASIC SAFETY**

Hard Hats protect workers heads against falling objects, fixed or protruding objects, inadvertent contact with electricity, exposure to UV, weather, and extremes of temperature. Always work according to the manufacturers guidelines.

### **DO I NEED A HARD HAT?**

Hard hats that comply with the standard AS/NZS 180:1997 (or equivalent) must be worn at all times while on site where there is a risk of objects falling from above. In fact hard hats are becoming mandatory on most sites in New Zealand. Hard hats should be worn in any area that has the potential for workers:

- to be hit or struck by falling, fixed, moving or protruding objects.
- to come in contact with electricity.
- be exposed to UV, weather, and extremes of temperature.

### **CHOOSING THE RIGHT HARD HAT FOR THE JOB**

Hard hats come in a range of styles to suit all types of work:

- Industrial - suitable for use in construction, factories and quarries.
- High temperature - suitable for use in processes such as steel and glass manufacturing.
- Bushfire fighting - suitable for use by emergency personnel for combating bush fires.
- Peakless - allowing clear upward vision.
- Peaked - providing shade for the eyes and some facial protection.
- Full brim - providing fuller protection from falling objects and UV as well as water shedding.
- Some hard hats allow for the attachment of accessories to add further protection such as face shields, respirators, hearing protection and work lamps.

When selecting your hard hat you should also consider whether ventilation or hi viz colouring is of benefit.

### **HOW HARD HATS WORK**

Hard hats are made of a hard outer shell designed to take the initial impact, and an inner harness designed to absorb and spread this impact which minimises the effects of the force to the skull.

### **WEARING YOUR HARD HAT CORRECTLY**

- Adjust the harness cradle to ensure comfort and total contact with your head at all times.
- It is recommended you do not wear clothing items on your head as this will result in the harness cradle becoming ineffective. This includes hoods, baseball caps, thickly woven or heavily seamed beanies or balaclavas. Some hairstyles such as dreadlocks are also not recommended.
- To secure your hard hat, you can use the elastic chin straps, or a four point retaining strap integrated with a harness when working at height.
- Ensure any attachments are compatible with the make and model of the hard hat.
- If you have any specific questions about wearing your hard hat it is a good idea to check with the manufacturer.

### **LOOKING AFTER YOUR HARD HAT**

- Store in a cool, dry environment, away from direct sunlight, heavy or sharp objects.
- Keep your hard hat away from chemicals including paints, paint thinners, solvent based adhesives (some stickers) and cleaning agents.
- Clean by scrubbing and immersing in warm soapy water, and rinsing in clean warm water.
- Sweat bands must be regularly replaced as required.
- If the hat loses its glossy finish and appears chalky, the shell must be replaced.

## PS55 ENDURANCE HELMET

Endurance vented ABS shell helmet with 6-point textile suspension harness and wheel ratchet size adjustment. Sold with 4-point chin strap included. Features an extended peak to minimise glare, wheel ratchet size adjustment and a seven year shelf life from manufacturing date. One size fits all. Certified AS/NZS 1801 Type 1.

**YELLOW, ORANGE, WHITE**  
**WHPS55 YEL | WHPS55 ORG | WHPS55 WHT**

## APEX X2 - VENTED

The Apex X2 is a multi-impact tested helmet with a vented shell to allow airflow through the helmet. Conforms to AS/NZS 1801EN12492:2012.  
**WHZAX2S01 + COLOUR**

**COMPLETE WITH 4 POINT CHINSTRAP**

## NEXUS HEIGHT MASTER HELMET

Vented ABS shell. Twist2Fit ratchet headband, micro peak, removable and adjustable 4-point chinstrap and liner. Available in white, fluoro yellow, fluoro orange, red, yellow, blue, orange, black, green.

**WHNCHV + COLOUR**

## TUFF-NUT RATCHET HARD HAT

## CHOOSING EYE PROTECTION

Wearing the right eye protection for the hazard is important. Always choose eye protection that complies with AS/NZS standards. Our Reps at PACCON can help you choose the right product for your job requirements.

HAZARD	WORK EXAMPLE	RECOMMENDED EYE PROTECTION
<b>Flying fragments and objects with low speed or low mass</b>	Manual chipping, riveting, spiralling, hammering, handling wire, brick cutting.	Face shields, goggles, or glasses with side shields with low impact protection (marked with an 'S').
<b>Small flying particles with medium speed or medium mass</b>	Machine disc cutting, scaling, grinding, and machining metals, certain woodworking operations, stone dressing.	Face shields, goggles, or glasses with side shields with medium impact protection (marked with an 'I' or 'F').
<b>Low mass, high speed particles</b>	Horticulture and gardening including lawn mowing and using weed eaters/ line trimmers.	Face shields, goggles, or glasses with side shields with medium impact protection (marked with an 'I' or 'F'). If working outdoors, they should also include UV protection - either tinted or outdoor untinted (marked with an 'O').
<b>High speed particles</b>	Using explosive power tools.	Face shields, goggles, or glasses with side shields with high impact protection (marked with a 'V' or 'B') or extra high impact protection (marked with an 'A').
<b>Airborne dust</b>	Roadwork, handling coal, sanding.	Dust resistant goggles (marked with a 'D' or '4').
<b>Liquid splash, harmful liquids, corrosives</b>	Working with hot bitumen, metal cleaning, plating, handling corrosives.	Splash resistant goggles and masks (marked with a 'C' or '3').
<b>Gases, vapours</b>	Working with harmful chemicals, spray painting, using aerosols.	Gas resistant goggles and masks (marked with a 'G' or '5').
<b>Splashing metals</b>	Metal casting, working with molten slag, molten metal, hot solids, galvanising baths, lead joining.	Molten metal resistant goggles and masks (marked with an 'M' or '9').
<b>Non-ionizing radiation</b>	Welding, cutting, furnace work, forging, gas welding.	Welding goggles and welding helmets complying with AS/NZS 1338.1. For gas welding, helmets should include rear facing indirect ventilation.
<b>Sun glare, ultraviolet radiation</b>	Any work outdoors.	Goggles or glasses with low impact protection (marked with an 'S') and either tinted or outdoor untinted (marked with an 'O').
<b>Biological liquid splashes, droplet infection, direct contamination</b>	Medical, veterinary, laboratory work.	Goggles and masks (marked with a 'C') with splash proof ventilation.

## Honeywell

## HEARING DAMAGE IS CUMULATIVE!

If workplace noise levels are too high, ambient sound will permanently damage hearing. The risk depends on how loud the noise is and how long a worker is exposed to it. Damage builds up gradually and changes will not be noticed from one day to the next.

But, once it occurs, noise damage is permanent and there is no cure. If exposure is kept to around 85 decibels over an 8 hour working day (about the noise level of city traffic from inside a car) most people will suffer no long-term damage. But with more intense noise exposure, damage may occur in a shorter time.

If you are assessing noise levels, remember that the decibel scale is logarithmic, which means every increase of 3dB doubles the sound level, and at that level it will take only half as long to damage your hearing.

## WHAT DOES THE SLC80 FIGURE MEAN?

Sound level conversion (SLC80) rating is the difference between the sound level of the environment in which the hearing protection is worn and the sound level reaching the wearer's ears. This is converted to a recommended noise range.

CLASS	SLC80 RATING (DB)	FOR USE IN NOISE
1	10 - 13 dB	Less than 90 dB
2	14 - 17 dB	90 to less than 95 dB
3	18 - 21 dB	95 to less than 100 dB
4	22 - 25 dB	100 to less than 105 dB
5	25 dB or greater	105 to less than 110 dB

## TYPES OF HEARING PROTECTION

There are 3 common types of hearing protection:

DISPOSABLES	These are usually made of soft expandable PU foam. The wearer rolls the plug between fingers to compress it before inserting it into the ear canal, where the plug expands again to seal against the individual contours of the wearer's ear. These are economical, designed for single use and are available in uncorded and corded options. There is also a metal detectable version with a metal tab in each plug and a metalized cord that can be easily detected if they accidentally fall into processing lines.
REUSEABLE EARPLUGS	These are moulded from washable soft plastic or silicone rubber and are usually 'flanged', with flexible ridges or flaps that circle the plug and enable it to seal gently against the ear canal. Corded and uncorded options are supplied in a handy resealable plastic case and can be reused.
EARMUFFS	Suppress unwanted noise by completely covering the outer ear with a plastic shell filled with sound-deadening material to prevent noise reaching the inner ear. Our styles come with a variety of features from adjustable headband to hard hat attachments to suit individual needs.

## Honeywell

### VERISHIELD VS120

Headband earmuff. 30db, Class 5, lightweight cushioned headband, steel-wire construction with padded headband and precision micro adjustments designed for just the right fit around the ear.  
**WH1035105**

## Honeywell

### VERISHIELD - NECKBAND

Robust construction with an oil-resistant cup. Ideal for workers with larger ears, or who wear hearing aids.  
**WH1035117 - 31db CLASS 5**  
**WH1035146 - 25db CLASS 4**

## Honeywell

### VERISHIELD VS110

Folding earmuff. 26dB. Class 5. Designed for use with other PPE. Easy to use and integrate with Honeywell hard hats and face shields.  
**WH1035103**

## Honeywell

### VERISHIELD - CAP ATTACHED

Large dimension range to comfortably fit a wide range of head sizes. 28db Class 5. Robust construction. An oil-resistant cup surface to withstand oily, heavy-work environments and frequent cleaning.  
**WH1035123**

### PELTOR CLASS 5 - PROTAC 111

High performance hearing protector developed for use in extremely noisy environments. Provides high attenuation for eight hour TWA noise exposures up to 105 db. 33db Class 5.  
**WHPROTAC111**

### CLASSIC EARMUFFS

Class 5 SLC8027db. Certified to AS/NZS 1270:2002 Hearing protection for noise levels to 110db(A). Lightweight, comfortable and economical.  
**WHMCLA**

### PELTOR NECK BAND EARMUFF

Suited to noisy environments with increased low frequency attenuation. Great for industrial noise or construction machinery, airports & agricultural work.  
**WHH520B 27db CLASS 5 | WHH510B 25db CLASS 4**

### PELTOR OVERHEAD EARMUFF

SLC80 rating 28dB (Class 5). Offers versatile protection and is very lightweight providing high wearer comfort.  
**WHH520A OTH | WHH520F FOLD**

### EARMUFFS TO ATTACH TO PELTOR HELMETS

26db - Class 5 lightweight helmet mounted hearing protectors. Developed for demanding noise-hazard environments they are a suitable choice for environments with substantial industrial noise or construction machinery, like airports and agricultural work. They feature a low-profile design that makes them easy to combine with other safety gear. Compatible with 3M 25mm hardhats and visors. Also includes 30mm hard hat adapter.  
**WHH520P3GS/E** \*Helmet not included

# HEADWEAR

## 3M PELTOR X-SERIE

### Features:

The X-Series earmuffs are 3M's latest advancement in hearing protection. New technologies in comfort, design and protection all come together in this groundbreaking earmuff line. The X4A utilizes a newly designed spacer, specially formulated foam liners and innovative ear cushions to help improve attenuation. This lightweight, lower-profile is designed for protection against moderate to high level industrial noise and other loud sounds. Features earcup pivot points that tilt for optimum comfort and efficiency, incredibly light weight & low profile, replaceable ear cushions and foam liners, bluetooth connectivity, talk/ streaming time approx. 8 hours, charge time approx. 3 hours, standby time approx. 250 hours, operating temperature range: -20°C to 55°C.

### Applications:

- Assembly • Blasting • Cleaning • Demolition • Electrical • Facility Maintenance • Grinding
- Machine Operations • Painting • Sanding

WHX4A - HEADBAND | WHX4P3EG - CAP ATTCHED

## PELTOR CLASS 4 EARMUFFS

The 3M Peltor Welding earmuff is designed to be worn primarily with 3M welding helmets. It provides moderate attenuation from noise arising from welding, cutting or grinding and slim enough to fit under a welding helmet. Protects against hazardous noise levels but still allows you to hear warning sounds, low profile and light weight, comfortable sealing rings, hygienic kit available.

WHH505B

## PELTOR WORKTUNES PRO HEADSET

Worktunes protect you from potentially harmful workplace noise while allowing you to listen to the built in AM/FM radio. Built-in antenna, digital station search and voice guided menu system with announced frequencies, 3.5 mm listen only stereo input (limited to 82 dB) for connection to external devices (e.g. mobile phone, radio and two-way radio). Auto power off after 4 hours of non-use with low- battery warning. Uses 2 AA batteries. To reduce corrosion caused by sweat, the electronics are in the outer part of the cup.

WHWORKTUNES

## PELTOR CLASS 4 EARMUFFS

3M PELTOR Optime I Earmuffs, are our innovative, lightweight hearing protectors that reduce noise levels up to 25 db. (Class 4).

They feature a low-profile design and neckband design, wide comfortable cushions that reduce pressure around the ears.

WHH9AY

**ESKO MAX28 BLUETOOTH EARMUFF**

- Stream 4.0 Bluetooth hearing protector.
- Protect your hearing whilst enjoying music streamed from your favorite device.
- Designed with a professional built-in headphone speaker so you can also make and receive phone calls.
- Simple Bluetooth pairing and disconnection.
- Easy-to-use side mounted controls.
- Make and receive phone calls via connected phone.
- AUX input allows connection to the external devices.
- Tested to AS/NZ 1270:2002, SLC80 28dB, Class 5.
- Communication time approx 8 hours.
- 3.5mm audio cable + USB charging cable.
- Instruction manual.

WHE28

**AMAZING PRODUCT, GREAT PRICE, PERFECT SOUND**

**ESKO MAX26 CAP ATTACHED EARMUFF**

- High quality ear cushions.
- Attach to hard hat with 30mm euro-slot connectors.
- Dielectric.
- Ratchet height adjustment.
- Class 5 26dB, AS/NZS 1270:2002

*\*Helmet not included*

WHE26

**COMPATIBLE WITH TUFF-NUT & NEXUS HELMETS**

**3M E-A-Rsoft FX POTTLE & DISPENSER**

3M One Touch Pro Earplug Dispenser 391-0000 gives workers convenient access to hearing protection products. A "No-Waste Funnel" accurately delivers earplugs with a slight turn. Dispenses a single earplug with each turn, giving the worker more control with less chance of spillage and waste of earplugs.

**WH391-1004 - 500 PAIRS POTTLE CLASS 5**

**WH391-1000 - DISPENSER UNIT**

**HONEYWELL MAX SERIES**

Bell shape delivers maximum in-ear comfort. Contoured design easier to insert, resists tendency to back-out of ear canal. Polyurethane foam enhances comfort, especially for long-term wear. Smooth, soil resistant closed cell-foam skin prevents dirt build-up.

**WHMAX-1 - UNCORDED | WHMAX-30 - CORDED**

**WHMAX-LS4 - 200 PAIRS UNCORDED REFILL BAG**

## TYPES OF RESPIRATORS

The most common types of respirators are:

### FILTERING FACEPIECE

A tight-fitting, air-purifying respirator. When used properly, this respirator helps filter out particles in the air and reduce inhalation of particles. Does not work for non-particulate hazards such as gases or vapors. Normally discarded after use.

### HALF-FACEPIECE ELASTOMERIC

A tight-fitting, air-purifying respirator with replaceable filters (for particulates) or cartridges or canisters (for gases and vapors). Can be cleaned, decontaminated and reused.

### FULL FACEPIECE ELASTOMERIC

A tight-fitting, air-purifying respirator with replaceable filters or cartridges. Covers the user's eyes and face, so it can also protect against liquid splashes and irritating vapors.

### POWERED AIR-PURIFYING (PAPR)

Has a blower that pulls air through attached filters, then pushes the filtered air into the facepiece, helmet or hood, which covers the user's face.

## CLASSIFICATION CODES FOR FILTERS EXPLAINED:

A guide to the AS/NZS1716 classification system for gas and vapour cartridge filters.

CLASS	USED FOR
P1	Mechanically generated particles, ie: dust. For use when sanding, grinding drilling, sweeping, etc. Filters at least 80% of airborne particles.
P2	Mechanically and thermally generated particles, ie: dust, fumes and mists. For use with wood dust, MDF, cement dust, lead, welding fumes etc. Filters at least 94% of airborne particles.
P3	Mechanically and thermally generated highly toxic particles, ie: organophosphates, asbestos (the filter must be used with a full facepiece), viruses and bacteria. Filters 99.95% of airborne particles.

## RESPIRATORY HAZARDS

Respiratory hazards are a fact of life on many job sites, there are six types of airborne hazards:

DUST	Sanding, grinding and brushing. Fibres from materials should also be treated as dust.
FUMES	Evaporation of solid material under intense heat such as welding.
GAS	Air like at room temperature.
MIST	Formed by processes that involve atomisation and tiny liquid droplets such as spraying.
VAPOUR	A gaseous state formed by evaporation of substances that are normally solid or liquid at room temperature.
OXYGEN DEFICIENCY/ ENRICHMENT	When an atmosphere contains less than 18% oxygen or the opposite, an excessively rich oxygen environment. Conventional masks are not suitable for these conditions and require specialist advice.

## WHAT IS THE DIFFERENCE BETWEEN P1 & P2 MASKS?

**Class P1** particulate filters are used for protection against mechanically generated particulates, eg. silica & wood dust.

**Class P2** particulate filters are used for protection against mechanically and thermally generated particulates or both, eg. metal fumes.

**3M**

### P1 CUPPED PARTICULATE RESPIRATOR 8310

Disposable respirator designed with comfort and fit in mind. soft, cushioned inner lining for added comfort. Compatible with other 3M safety products.

**WHRES8310**

**PRO**

### DISPOSABLE P1 DUST MASK

P1 dust mask. AS/NZ 1716 2003.  
**BOX OF 20 | ONE SIZE FITS MOST**  
**WHEP301**

**3M**

### P1 VALVED FLAT FOLD RESPIRATOR

3 panel design, low breathing resistance, 3M cool flow valve, flat folded, embossed top panel helps reduce fogging of eyewear. Sculpted nose panel.

**BOX OF 10 | WHRES9312A+**

**3M**

### P1 CUPPED PARTICULATE RESPIRATOR 8812 WITH VALVE

Complies with AS/NZ 1716:2012  
Does not contain components made from natural rubber latex.

**BOX OF 10 | WHRES8812**

**PRO**

### P1 RESPIRATOR WITH VALVE

Valved respirator with latex free straps give firm and comfortable fit. Moulded nose piece for close fit and better seal.

**WHEP315**

**3M**

### P2 VALVED MASK

Complies with AS/NZS 1716:2012. Made from 3M advanced electret filter material. No components made from natural rubber latex. Suitable for use where silica dust is present.

**WHRES8822**

**esko**

### P2 FLAT FOLD RESPIRATOR

Foldable, exhalation valve for extra air flow. Individually packaged, colour coded packaging for ease of identification, dual straps give firm & comfortable fit.

**BOX OF 10 | WHDRP2VF**

**PRO**

### P2 VALVED MASK

Certified to AS/NZS 1716:2012. ProValve exhalation valve for decreased breathing resistance and heat stress.

**BOX OF 12 | WHEP321B**

**BOX OF 20 | WHPC321-20**

**PRO**

### P2 NON-VALVED MASKS

Certified to AS/NZS 1716:2012. Disposable P2 mask, nose flange for increased protection & facial fit.

**BOX OF 20 | WHEPC305**

**esko**

### BREATHE EASY P2 VALVED MASK

Protection from Legionnaires disease when handling potting mix, etc. AIR8 exhalation valve for extra air flow, dual straps give firm and comfortable fit.

**BOX OF 12 | WHDRP2V**

**TOP  
SELLER**

**esko**

### BREATHE EASY P2 MASK VALVED WITH CARBON FILTER

AIR8 exhalation valve for easier airflow. Activated carbon protects against lower-level organic vapours in addition to P2 rating. Dual straps give firm and comfortable fit.

**BOX OF 12 | WHDRP2VC**

**PRO**

### PROMESH MASKS

Flexible mesh for airtight fit. Protects against nuisance level organic vapours in addition to P2 rating. Moulded nose piece, quick lock straps for easy fit and release.

**WHEPC882**

**WHEPC823 - WITH CARBON FILTER**

### SURGICAL MASKS

3 ply surgical non-woven mask with ear loops. Protects against droplets.

**W05**

## 3M HALF AND FULL FACE RESPIRATORS

### 3M RUGGED COMFORT QUICK LATCH HALF FACE PIECE REUSEABLE RESPIRATOR

- Excellent value!
- Quick latch drop down mechanism for easy on/off.
- No need to remove your safety helmet or faceshield when lowering or raising your respirator.
- Resilient silicone face seal helps provide comfort, durability, and stability with a soft but firm seal.
- Exhalation valve cover helps direct exhale breath and moisture downward to reduce fogging of eyewear and grinding and welding shields.
- Adjustable head harness assembly offers improved fit and comfort.
- Bayonet connection fitting system to a broad range of filters to protect against gases, vapours and particulates.

**WHRES6501QL SM - SMALL**  
**WHRES6502QL MD - MEDIUM**  
**WHRES6503QL LG - LARGE**

### 3M HALF FACE REUSEABLE RESPIRATOR 6000 SERIES

The 3M™ Half Face Reusable Respirator 6000 Series is low-maintenance, simple to use and extremely lightweight. Combine with a broad range of twin, lightweight 3M™ filters or cartridges to provide respiratory protection against particulates and a variety of gases and vapours. AS/NZS 1716:2003

- Soft, lightweight elastomeric respirator.
- Flexible System (gas & vapour and/or particulate filters plus Supplied-Air option).
- Twin filter design provides lower breathing resistance, and improves field of vision.
- Cost effective replacement filters.
- Safe, secure Bayonet filter attachment system.
- Easy and secure fitting.
- Face piece weight: 82 grams

**WHRES6100 - SMALL | WHRES6200 - MEDIUM**  
**WHRES6300 - LARGE**

### 3M FULL FACE REUSEABLE RESPIRATOR 6000 SERIES

Soft, elastomeric face piece, wide field of vision. Polycarbonate, high impact visor. Four straps. EN166:B  
**WHRES6700 SM - SMALL**  
**WHRES6800 MD - MEDIUM**  
**WHRES6900 LG - LARGE**

**WELDING/PARTICULATE GP2 KIT**  
**Contains:** 1 6500QL medium face piece, 2 pairs particulate metal fume filters, 2 cleaning wipes plus a respiratory protection guide.

**WHRES6528QLS - SMALL**  
**WHRES6528QL MD - MEDIUM**  
**WHRES6528QL LG - LARGE**

**ORGANIC VAPOURS & PARTICULATES SPRAY KIT**  
**Contains:** 1 half face respirator 6500QL series, 1 pair of 6051 A1 cartridges, 1 pair of particulate 5925 P2 filters, 1 pair of filter retainers, 2 respirator wipes.

**WHRES6551QL SM - SMALL**  
**WHRES6551QL MD - MEDIUM**  
**WHRES6551QL LG - LARGE**

**WE STOCK** a range of filters, cartridges and accessories for 3M's 6000 series full face and 6500 series half mask respirators (see previous page.) Filters provide protection from many dusts, fibres, fumes, or mists, cartridges protect against different gases and vapours. Filters with P1 rating filter about 80% of particles smaller than 2 micrometres. Filters with P2 rating filter about 94% of particles smaller than 0.5 micrometres. Filters with P3 rating filter about 99.95% of particles smaller than 0.5 micrometres.

 <p><b>2125 P2 FILTER</b> Protection from certain particles, dusts, mists and fumes. <b>WHRES2125</b></p>	 <p><b>2128 P2 FILTER</b> Protection from ozone and nuisance level acid gas &amp; organic vapours with low vapour pressure. <b>WHRES2128</b></p>
 <p><b>2138 P2 FILTER</b> Protection from ozone and nuisance level acid gas &amp; organic vapours with low vapour pressure. <b>WHRES2138</b></p>	 <p><b>2135 P2/P3 FILTER</b> Protection from toxic particles such as asbestos. Also for mould remediation and beryllium. <b>WHRES2135</b></p>
 <p><b>6057 CARTRIDGE A1B1E1</b> Provides protection from organic vapours - boiling point &gt; 65°C inorganic &amp; acid gases. <b>WHRES6057</b></p>	 <p><b>6051 CARTRIDGE A1</b> Protection when using organic solvents. Also degreasing, using paint thinner, lacquers &amp; glues. <b>WHRES6051</b></p>
 <p><b>6059 CARTRIDGE A1B1E1K1</b> Provides protection from a variety of chemicals eg. chlorine, hydrogen etc. <b>WHRES6059</b></p>	 <p><b>6035 P2/P3 CARTRIDGE</b> Protection from certain particles, dusts, mists and fumes, lead or mould remediation. <b>WHRES6035</b></p>
 <p><b>5925 P2 PRE FILTER</b> Protection from certain particles, dusts, mists and fumes. 10 pairs per box. <b>WHRES5925</b></p>	 <p><b>PLASTIC FILTER RETAINERS</b> Holds 5925 filter for 6000 series. Sold individually. <b>WHRES501</b></p>
 <p><b>6583 EXHALATION VALVE</b> Replacement part for half face reusable respirator 6500 and 6500QL series. <b>WHRES6583</b></p>	 <p><b>6893 INHALATION VALVE</b> Replacement part for half face reusable respirator 6500 and 6500QL series. <b>WHRES6893</b></p>
 <p><b>6897 FULL HEAD HARNESS</b> A replacement part for full face reusable respirator 6000 series. <b>WHRES6897</b></p>	 <p><b>6582 QUICK LATCH HEAD HARNESS</b> Comfort quick latch harness for half face 6500QL series. 20 per pack. <b>WHRES6582</b></p>
 <p><b>6896 CENTRE ADAPTER GASKET</b> A replacement part for full face reusable respirator 6000 series. <b>WHRES6896</b></p>	 <p><b>6885 VISOR FILM</b> Full face reusable respirator 6000 series face shield. Easy peel off and replace. Pack of 25. <b>WHRES6885</b></p>
 <p><b>6898 CLEAR LENS ASSEMBLY</b> A replacement clear lens for full face reusable respirator 6000 series. <b>WHRES6898</b></p>	 <p><b>504 RESPIRATOR WIPES</b> Pre-moistened towelettes for hygienically cleaning reusable respirators. Box of 100. <b>WHRES504</b></p>

**3M** FULL FACE RESPIRATORY PROTECTION AND FILTERS

### 3M FULL FACE RESPIRATOR FF-400 SERIES

This full facepiece respirator mask features a lightweight design, high chemical resistance, and soft silicone facepiece for amazing comfort. Provides the highest safety protection for eyes, face, and respiratory system.

- Engineered for maximum comfort, durability, and visibility.
- The only respirator with Scotchgard for easier cleaning and maintenance.
- 3M Cool Flow Exhalation Valve for easier breathing and cool, dry comfort.
- Passive speaking diaphragm for easier communication.
- Soft durable silicone face seal and head harness.
- Large lens for superior peripheral vision.
- Low profile bayonet cartridge attachments.
- Six strap head harness with comfort cradle.

S,M,L | WHRESFF4400

### VERSAFLO POWERED AIR PURIFYING RESPIRATOR KIT

- Protection from hazardous particles and some nuisance level gases and vapours
- Slim, lightweight
- Controlled air flow at a nominal rate of 190 l/min
- Easy to use and maintain
- Battery charge indicator
- IP53 rating.
- 10 - 12 hours operation with fully charged battery pack and new main filter.

WHRESTR315A

### HEADCOVER WITH INTEGRATED HEAD SUSPENSION

- General purpose, cost effective fabric
- No assembly required
- Visor has a wide field of view
- Provides excellent airflow distribution for improved comfort
- Ready to use out of the box
- Integrated head suspension
- Suitable for applications that require frequent replacement of entire headgear.

WHRES133-L

### VERSAFLO RESPIRATORY FACESHIELD ASSEMBLY WITH FLAME RESISTANT FACESEAL

Designed to work with 3M Supplied Air Respiratory Systems • Deflector allows users to direct the airflow inside the head top • Fully-adjustable suspension for customized fit • Accessory options available.

WHRESM207

### VERSAFLO RESPIRATORY HARD HAT ASSEMBLY M-307, WITH PREMIUM VISOR AND FACESEAL

Designed to work with 3M Supplied Air Respiratory Systems • Deflector allows users to direct the airflow inside the head top • Fully-adjustable suspension for customized fit • Accessory options available.

WHRESM307

### VERSAFLO SPRAY PAINTERS KIT

The 3M Versaflo Spray Painters Kit is a ready-to-use assembly that delivers integrated supplied air respiratory, eye and face with optional hearing protection. The kit includes Versaflo Supplied Air Regulator, V-500E with accessories and Versaflo High Impact Faceshield M-106 with comfort face seal.

WHRESALVM106E

### VERSAFLO P3 PART FILTER

High efficiency P3 filter. The filter can be changed quickly and easily by hand. For use with 3M TR-300+ Powered Air Respirator.

WHRESTR3712EP3

### VERSAFLO P3 PART FILTER

P3 particulate filter with nuisance level organic vapour relief. Can be changed quickly and easily, for use with 3M TR-300+ Powered Air Respirator.

## WHAT ARE NZ'S GLOVE STANDARDS AND WHAT THEY MEAN

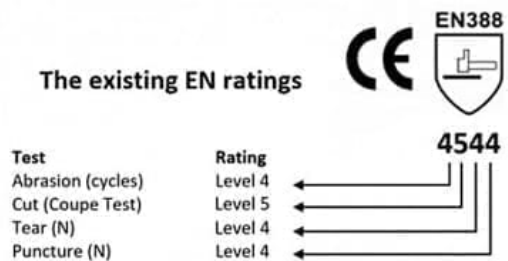

The AS/NZS 2161:2014 is the overall standard for New Zealand occupational protective gloves. But because the EN (European Union) testing standards are so comprehensive, many countries in the Asia-Pacific region have adopted them. As a result, a number of NZ workplace safety standards are identical to those used in Europe. For example, the European standard EN420 is the same as AS/NZS2161.2:1. This standard sets out the requirements for all occupational safety gloves (except for electrical and medical gloves). The CE marking is a conformity mark, which certifies that a particular product has met the European Union's rigorous consumer, safety and environmental requirements. All manufacturers of safety gloves sold in the EU must meet these requirements, including testing methods and marking rules.

### A GUIDE TO THE RATINGS AND PICTOGRAMS USED IN THE EN STANDARDS:

#### EN420 - General requirements

This standard defines the general requirements for protective gloves in terms of construction, fitness of purpose, safety, etc. The pictogram indicates that the user has to consult the 'instructions for use'.

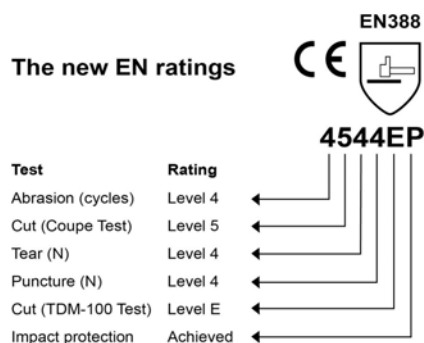

#### The existing EN ratings

#### EN388 - Mechanical protection

Mechanical risk is the risk caused by abrasion, blade cut, tear and puncture to the wearer of the glove. Every glove is tested for its resistance against each of these risks and is given a numerical rating for each. The higher the number, the better the performance of the glove. The numbers under the shield give the glove's test ratings for its mechanical protection properties of abrasion resistance, cut resistance, tear resistance and puncture resistance. The pictogram below shows EN rating of 4544, the highest possible rating.

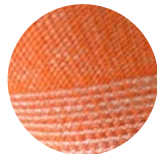

### RECENT CHANGES TO THE EN TESTING REGIME?

From 30 November 2016 some changes have been introduced to the EN regime, which are shown as two extra letters added to the numbers below the pictogram shield. These letters show the results of an additional test for cut resistance and a test for impact resistance.

The fifth symbol indicates the result of the ISO 13997 TDM cut resistance test. This test uses a sliding blade instead of the rotating circular blade of the Coupe test. The glove is assigned a cut protection class on the basis of this value.

## WHY HI VIS

Hi vis clothing makes its wearers more visible. In that way, it is meant to prevent injuries and accidents. People wearing a hi vis vest, for example, are visible because the vest has patches of fabric that are either fluorescent or reflects the light. Both types of hi vis clothing work in a different way:

- Fluorescent hi vis clothing is made out of synthetic materials to which a specific type of dye is added. This dye converts the short-wavelength energy into light making the clothing more visible.
- Fluorescent hi vis clothing is most effective during daylight. Artificial lights, especially UV lights are not rich in short wave energy, so they reduce the effects of such clothing.
- Retroreflective high visibility clothing is best used for safety in traffic. It reflects the light that is pointed directly to it - like from behind the wheel. It is not that effective when observed from other angles.

The specifics of these are listed in AS/NZS 1906.4:2010 and AS/NZS 4602:1:2011.

### WHAT COLOURS ARE CONSIDERED HI VIS?

The only two colours that are acceptable by hi vis clothing regulations in NZ are yellow and red-orange. Red is only allowed if it is in the orange spectrum. Otherwise, it cannot be considered a hi vis colour as it is not easily discernible for some people with a specific type of colour-blindness. This is regulated by AS/NZS 1906.4:2010.

### HOW MANY CLASSES OF HI VIS ARE THERE IN NZ?

There are three classes of hi vis clothing in NZ, Class D, Class D/N and Class N. NZ regulates its garments in accordance with their use. Since these three classes have different uses, they must meet different hi vis clothing regulations.

**CLASS D** - Intended for daytime use. It is not compliant with the hi vis standards in NZ if it is used outside daylight hours. It needs to have at least 0.2 sq m of fluorescent yellow or orange-red colour on both front and back side. However, fluorescent colour should not be on the sleeves or collars.

**CLASS D/N** - For those that need to wear safety hi vis clothing during both daytime & nighttime, Class D/N is the best option. It has similar requirements for the amount of fluorescent material on them, but there is also the requirement for strips of reflective tape. While fluorescent material is not suitable for nighttime, reflective tape is.

**CLASS N** - This type of hi vis clothing is suitable for nighttime. Since the fluorescent colours are not visible without daylight, the colours of this clothing is not that important as long as it has enough reflecting tape on it. That tape has to be at least 5cm wide and it has to meet a certain configuration.

- All hi vis in NZ is required to have at least 0.2 square metres of fluorescent material on the front of any hi vis garment and the same size patch on the back. This fluorescent area should not be interrupted.
- The reflective hi vis tape clothing needs to be at least 5cm wide. Hi vis clothing regulations in NZ require for the tape to be in one of the five allowed positions.
- Logos can be used on reflective parts of clothing, as long as it still leaves enough reflective clothing visible. On the other hand, logos cannot be placed over the reflective tape and should be less than 10 x 10cm in size.
- It is permitted to add underarm venting squares that are up to 10 x 10cm of size.

## TITAN 380 BWF DISPOSABLE COVERALLS

Breathable waterproof fabric (BWF), PFAS free. Approved for asbestos removal and biohazards. Penetration resistance standards - chemical and blood. 4-thread seam stitching, 3-3.5 stitches per cm, strong seam strength. Elastic is stitched outside the coverall to avoid possible allergic reaction. Auto-locking two way zip.

### Uses can include:

- Asbestos abatement
- Paint spraying
- Fibreglass work
- Cleaning/hygiene
- Forensic decontamination
- Biohazards
- Insulation installation
- Biosecurity
- Veterinary
- Healthcare
- Laboratory
- General trades

## SAFETY BOOTS CODES EXPLAINED

When purchasing safety boots there is a lot to consider. The first thing we usually think about is looks. This is certainly important, you want to be happy in what you wear. However, there are many different codes and abbreviations associated with safety footwear that will give you an idea of just how much protection your footwear will provide. Here is a guide to those codes and a description of what they mean.

### EN ISO 20345:2011

If you see this on a product description, you know your safety boots meet the minimum requirements.

### AS/NZS 2210.3:2000

Australia/New Zealand equivalent of ISO 20345.

### SAFETY BOOTS RATINGS

There are several ratings for safety boots and they are denoted by a two-letter abbreviation.

SB	Safety basic: This is the basic safety standard for footwear. These will have toe protection against a 200-joule impact.
S1	As well as the basic toe protection, S1 will ensure that footwear has anti-static protection, is resistant to fuel oil and has energy absorption in the heel.
S2	These have all the same protection as S1, plus the added protection of preventing water penetration and absorption of the uppers.
S3	This as all the same protection as S2 level, plus midsole penetration resistance.
S4	The same level of protection offered by S1 but with a moulded polymer/rubber upper (e.g. Gumboots) making them fully waterproof.
S5	The same features as S4 footwear with the additional benefit of midsole penetration resistance.

### ABBREVIATIONS:

Sometimes a manufacturer will add on an additional letters. Here is a list of the commonly used ones:

P	Penetration resistance	C	Conductive
A	Antistatic	I	Electricity Insulating Footwear
WR	Water resistance	M	Metatarsal Protection
AN	Ankle protection	CR	Cut Resistant Upper
WRU	Water penetration & water absorption upper	HRO	Outsole Resistance to Hot Contact

### SLIP RESISTANCE:

Footwear that as an anti-slip rating can also be added, there are three codes used for slip resistance.

SRA	Tested on ceramic tile wetted with dilute soap solution.
SRB	Tested on smooth steel with glycerol.
SRC	Tested under both the above conditions.

### POINTS TO REMEMBER:

Get the right boots for your working environment, fit and comfort are paramount. Look after your footwear, always buy new and high price does not always mean a better or safer boot.

## PUMA SIERRA NEVADA

The Puma Safety Sierra Nevada Black zip sided boot incorporates a waterproof breathable membrane, making this a fully waterproof work boot. The upper is made of water repellent waxed premium leather and has a drawn-up scuff cap in the toe area to reduce leather abrasion when working on knees.

This model has a lightweight fibreglass toe cap and contains a shock absorbing gel cell in the heel for the wearer's comfort. As with all styles from the Scuff cap range, the Sierra Nevada Black is electrical hazard rated for greater protection against electrical shock.

### FEATURES

- Lightweight fibreglass toe cap 200j impact protection.
- Electrical hazard rated - ASTM F2413 Standard (USA).
- YKK spiral zip side with waterproof webbing.
- Water repellent waxed leather upper, dust tongue and collar of soft nappa leather.
- BreathActive lining for maximum moisture control and comfort.
- Coates waterproof membrane.
- Soft cushioning gel cell embedded in the heel.
- Rubber sole 300°C heat resistant and SRC rated slip resistant.

6-13 | BLACK | WBSIERRA

## PUMA SAFETY IRON HEAVY DUTY

A perfect balance between toughness, style, comfort and uncompromising safety. The HEAVY DUTY line seamlessly blends rugged durability with stylish design and unmatched protection for the roughest working conditions. Engineered with latest technology and innovative materials.

### FEATURES:

- Waterproof boots with premium oiled full grain leather.
- Protection composite-fiberglass toe cap.
- Heel counter for extra stability and protection, ladder grip.
- Shank extra high scuff cap.
- Oil resistant outsole HEAVY DUTY - TPU outsole with slip resistant octopus pattern for enhanced grip (self-cleaning) and ladder grip.

6-13 | BROWN, BLACK | WBIRONHD

## THE ABCDE OF FALL PROTECTION

The A,B,C,D & E of Fall Protection covers the fundamental requirements of *every* personal fall protection system. Use it as a guide when evaluating your fall protection requirements, however, always consult a fall protection specialist if you're unsure of any aspect of fall protection or fall protection equipment.

### A: ANCHORAGE

Anchorage devices provide a secure point of attachment (to an existing structure) for the fall arrest system. Anchorage devices can be permanent or temporary and vary to suit the types of structure available.

### B: BODY SUPPORT

Full body harnesses connect the worker to the fall arrest system. They are specially designed to protect the worker against serious injury in the event of a fall whilst also remaining comfortable to wear.

### C: CONNECTING DEVICE

Connectors are devices that connect the full body harness to the anchorage system, they can be single products or multiple devices working together.

### D: DESCENT/RESCUE

Descent and rescue systems enable the retrieval of an injured or incapacitated worker. In the event of a rescue, this equipment facilitates rapid recovery of the worker without endangering other workers in the process.

### E: EDUCATION

All employees exposed to fall hazards must receive training by a competent person that addresses the nature of the hazards in the work area. Procedures for erecting, maintaining, disassembling and inspecting fall arrest equipment and use and operation of fall arrest equipment.

The table below provides assistance in selecting the right equipment for keeping people safe at height:

**WORKING CONDITIONS** - Slopes, poor ground, obstructions and traffic can determine the choice of work equipment. For example, an elevating work platform (EWP) could reach over bad ground or obstructions as long as its stability was not compromised. An EWP may be preferable to a tower scaffold in such circumstances.

**DISTANCE TO BE NEGOTIATED FOR ACCESS AND EGRESS** - Ladders are likely to be less suitable for higher access.

**DISTANCE AND CONSEQUENCES OF A FALL** - A fall arrest system would be ineffective if the deployment length was greater than the fall height. The user would hit the floor before the system could deploy.

**DURATION AND FREQUENCY OF USE** - Long-duration, higher frequency work justifies a higher standard of fall protection, eg, a tower scaffold rather than a ladder. However, a ladder may be justified for short duration low-risk repetitive work.

**RESCUE** - If rescue from a deployed fall arrest system is going to be difficult, choose other work equipment, eg, an EWP.

**ADDITIONAL RISK POSED BY THE INSTALLATION AND REMOVAL OF WORK EQUIPMENT** - An EWP used by one person may entail less risk than exposing two or three people to erect a tower or scaffold for the one person to work safely.

**MONITORING THE APPROACH TO WORKING AT HEIGHT SAFELY** - The approach should be constantly assessed to ensure it is effective and fit for purpose. This could mean carrying out regular inspections of the control measures, discussing the control measures at tool box talks and site meetings with contractors, and actively supervising the work.

**DOCUMENT THE APPROACH TO WORKING AT HEIGHT SAFELY** - A good record of the planning process and communications with clients, contractors, workers, and other site visitors should be maintained.

# HEIGHT SAFETY

ZERO FALL & ARREST HARNESSSES | LANYARDS

## TRADESMAN MULTI-PURPOSE FALL ARREST HARNESS

The Tradesman set is a practical solution for work carried out on elevated work platforms. With an integrated adjustable webbing lanyard and shock absorber on the rear D, it is easy to stay secure on EWP's (elevated working platforms) or any other anchorage point. The harness is fully adjustable with quick connect buckles, fall indicators make pre-inspection simple. Suitable for MEWP (mobile elevated working platform) work, roofing, construction work, scaffolding and general industrial work.

- Front fall arrest attachment point.
- Rear fall arrest D-ring attachment point.
- Integrated adjustable webbing lanyard.
- Quick connect adjustable buckles with connection indicator.
- Fall indicators.
- Velcro covered harness labelling.
- Forged steel hardware.
- Available in 2 sizes.

WHLT17LX5

## HARNESS & LANYARD COMBO

## TRADESMAN MULTI-PURPOSE FALL ARREST HARNESS

Rear fall arrest D-ring attachment point, breathable 3D moisture wicking padding, quick connect adjustable buckles with connection indicator, extra wide, padded leg straps, polyester webbing construction, fall indicators, velcro covered harness labelling, forged steel hardware.

Available in 3 sizes.

WHTP0017

## UTILITY FALL ARREST HARNESS

Front fall arrest attachment point, rear fall arrest D-ring attachment, quick connect adjustable buckles with connection indicator, polyester webbing construction, lanyard stowage points, fall indicators, velcro covered harness labelling, forged steel hardware. Permitted to work in potentially explosive areas.

Available in 3 sizes.

WHUS0017

## ZERO SCAFFPRO DOUBLE ELASTICATED LANYARD WITH SNAPHOOKS & SCAFF HOOKS 2M

A favourite with scaffolders, construction & plant maintenance workers, the ScaffPro twin-tailed lanyard is designed for continuous 3-point connection to reduce the risk of a fall and the compact elasticated twin legs provide unhindered movement when not in use. The ZERO energy absorption system rapidly reduces energy in a fall and the heavy-duty cover protects the lanyard damage.

WHLSZ2W5E

## ZERO UTILITY HEIGHT SAFETY KIT

Ideal height safety/fall arrest kit with everything required for compliance when working on mobile work platforms, scaffolding and connecting to fixed line systems and roof anchors.

**Contents:** HUS0017 utility quick connect harness, APX05 apex multi helmet, LTZ0WX5 lanyard with scaffold hook, PJ501 screw gate oval karabiner, ASP000W/015 webbing sling 1.2m, ZBP harness gear backpack.

WHSSKB100

## ALL TRADE MULTI PURPOSE HARNESS

Great all-rounder, suitable for general tradesperson, construction, confined space, roofing, vertical climbing. Rescue loops on the shoulders, polyester webbing construction, quick connect buckles on leg straps & chest, front & rear D attachment points, forged steel hardware, velcro wrapped labels.

### SPILL KIT 120LTR OIL & FUEL ONLY

**WSNZSKOF120**

2 x 15L (FSGP15) & 30L Floor Sweep (FSGP30) | 30 x Oil & Fuel Pads (APW300) | 2 x White Oil & Fuel Boom 1.2m (BW420) | 1 x White Oil & Fuel Pillow 420g (PW420) | 5 x Containment Waste Bag (CWB) | 1 x Green Nitrile Gloves (RNF15L) | 1 x Dust Pan and Brush Set (DPBS)

### SPILL KIT 240LTR OIL & FUEL ONLY

**WSNZSKOF240**

3 x 15L (FSGP15) & 30L Floor Sweep (FSGP30) | 3 x 1.2m (BW420) | 2.4m (BW840) White Oil & Fuel Booms | 3 x White Oil & Fuel Pillow 420g (PW420) | 5 x Containment Waste Bag (CWB) | 1 x Green Nitrile Gloves (RNF15L) | 60 x Oil & Fuel Pads (APW300) | 1 x Dust Pan and Brush Set (DPBS)

## HAZCHEM SPILL KITS

Hazchem Spill Kits colour coded yellow for Hazchem liquid spill absorption. Designed for acids, alkalis, coolants, paints and oils and fuels and are made from inert material which will not react with any absorbed liquids. For general industry and non-industry applications.

### SPILL KIT 25LTR HAZCHEM

**WSNZSKH025**

2 x Yellow HAZCHEM Boom 1.2m (BY420) | 10 x HAZCHEM Pads (APY300) | 1 x Containment Waste Bag (CWB) | 1 x Green Nitrile Gloves (RNF15L)

### SPILL KIT 50LTR HAZCHEM

**WSNZSKH050**

2 x Yellow HAZCHEM Boom 1.2m (BY420) | 1 x Yellow HAZCHEM Pillow 420g (PY420) | 20 x HAZCHEM Pads (APY300) | 1 x Containment Waste Bag (CWB) | 1 x Green Nitrile Gloves (RNF15L)

### SPILL KIT 120LTR HAZCHEM

**WSNZSKH120**

30 x HAZCHEM Pads (APY300) | 2 x Yellow HAZCHEM Boom 1.2m (BY420) | 1 x Yellow Hazchem Pillow 420g (PY420) | 5 x Containment Waste Bag (CWB) | 1 x Green Nitrile Gloves (RNF15L) | 3 x 30L Zeolite Floor Sweep (FSZ30) | 1 x Dust Pan and Brush Set

### SPILL KIT 240LTR HAZCHEM

**WSNZSKH240**

70 x HAZCHEM Pads (APY300) | 3 x Yellow HAZCHEM Boom 1.2m (BY420) | 3 x Yellow HAZCHEM Boom 2.4m (BY840) | 3 x Yellow HAZCHEM Pillow 420g (PY420) | 5 x Containment Waste Bag (CWB) | 1 x Green Nitrile Gloves (RNF15L) | 4 x Zeolite Floor Sweep (FSZ30) | 1 x Dust Pan and Brush Set (DPBS)

**PLEASE NOTE:** The 120ltr and 240ltr spill kits are packed in a wheelie bin. As these are a large and heavy item you will incur a freight charge. We usually arrange for the kit to be shipped direct from our supplier to your premises to save double handling and any additional freight charges. Please contact your Rep or PACCON direct for more information.

# SPILL KITS

SPILL KITS | GENERAL | OIL | HAZCHEM

## GENERAL PURPOSE SPILL KITS

General-purpose spill kit that can be used with any liquid spills including, oil, petrol, diesel, liquid chemicals, paint etc. Absorbs up to 120L. Not suitable for some strong acids including Nitric and Hydrofluoric Acid.

### SPILL KIT 30LTR GENERAL PURPOSE

Universal pads 400gsm x 5 | universal sock 1.2m x 1 | absorbent fibre 25L bag x 1 | FFP2 disposable mask x 1 | Pair chemical gloves - XL x 1 | waste disposal bags x 2 | cable ties x 2, dust pan and brush set x 1 | instruction card

**WSSKC30**

### SPILL KIT 50LTR GENERAL PURPOSE

Universal pads 400gsm x 6 | universal sock 3m x 1 | universal sock 1.2m x 1 | spillsorb® absorbent fibre 25L bag x 1 | FFP2 disposable mask x 1 | pair chemical gloves - XL x 1 | waste disposal bags x 2 | cable ties x 2 | dust pan and brush set x 1 | instruction card

**WSSKC50**

### SPILL KIT 120LTR GENERAL PURPOSE

Universal pads 400gsm x 15 | universal sock 3m x 2 | universal sock 1.2m x 1 | spillsorb® absorbent fibre 25L bag x 3 | FFP2 disposable mask x 1 | pair chemical gloves - XL x 1 | waste disposal bags x 2 | cable ties x 2 | dust pan and brush set x 1 | instruction card | breakaway red cable tie

**WSSKC120**

### SPILL KIT 240LTR GENERAL PURPOSE

Universal pads 400gsm x 45 | universal sock 3m x 3 | spillsorb absorbent fibre 150L bag x 1 | FFP2 disposable mask x 1 | pair chemical gloves - XL x 1 | waste disposal bags X 2 | cable ties x 2 | dust pan and brush set x 1 | instruction card | breakaway red cable tie

**WSSKC240**

## OIL AND FUEL ONLY SPILL KITS

Oil and Fuel Spill Only Kits colour coded white for hydrocarbon spill absorption. Takes on board hydrocarbon liquids such as fuel, petrol, diesel, oil, solvents. Designed to repel water making them ideal for oil and fuel spill recovery on either land or water. For general industry and non-industry applications.

### SPILL KIT 25LTR OIL & FUEL ONLY

Oil pads 400gsm x 5 | oil sock 1.2m x 2 | oil pillow x 1 | pair chemical gloves - XL x 1 | waste disposal bags x 2 | instruction card | cable ties x 2

**WSSK025**

### SPILL KIT 50LTR OIL & FUEL ONLY

Oil pads 400gsm x 15 | oil sock 3m x 1 | oil sock 1.2m x 1 | oil pillow x 1 | pair chemical gloves - XL x 1 | waste disposal bags x 2 | cable ties x 2 | instruction card

**WSSK050**

### SPILL KIT 120LTR OIL & FUEL ONLY

Oil pads 400gsm x 50 | oil sock 3m x 2 | oil pillow x 1 | oil sock 1.2m x 2 | pair chemical gloves - XL x 1 | 140L red wheelie bin x 1 | waste disposal bags x 2 | instruction card | cable ties x 2 | breakaway red cable tie x 1

**WSSK0120**

### SPILL KIT 240LTR OIL & FUEL ONLY

Oil pads 400gsm x 35 | oil sock 3m x 3 | pair chemical gloves - XL x 1 | waste disposal bags x 2 | spillsorb 150L absorbent bag x 1 | FFP2 disposable mask x 1 | instruction card | cable ties x 2 | dustpan set x 1 | breakaway red cable tie x 1

**WSSK0240**

## HAZCHEM SPILL KITS

Hazchem Spill Kits colour coded yellow for Hazchem liquid spill absorption. Designed for acids, alkalis, coolants, paints and oils and fuels and are made from inert material which will not react with any absorbed liquids. For general industry and non-industry applications.

### SPILL KIT 25LTR HAZCHEM

Chemical pads 400gsm x 5 | chemical pillow x 1 | chemical socks 3m x 1 | pair chemical gloves - XL x 1 | waste disposal bags x 2 | instruction card | cable ties x 2

**WSSKC25**

### SPILL KIT 50LTR HAZCHEM

Chemical pads 400gsm x 25 | chemical socks 3m x 1 | chemical socks 1.2m x 1 | chemical pillows x 1 | pair chemical gloves - XL x 1 | waste disposal bags x 2 | instruction card | cable ties x 2

**WSSKC50**

### SPILL KIT 120LTR HAZCHEM

Chemical pads 400gsm x 50 | chemical socks 3m x 3 | chemical socks 1.2m x 2 | chemical pillows x 2 | pair chemical gloves - XL x 1 | waste disposal bags x 2 | cable ties x 2 | instruction card | breakaway red cable tie x 1

**WSSKC120**

### SPILL KIT 240LTR HAZCHEM

Chemical pads 400gsm x 100 | chemical socks 1.2m x 4 | chemical socks 3m x 5 | chemical pillows x 5 | pair chemical gloves - XL x 1 | waste disposal bags x 2 | instruction card | cable ties x 2 | breakaway red cable tie x 1

**WSSKC240**

**PLEASE NOTE:** The 120ltr and 240ltr spill kits are packed in a wheelie bin. As these are a large and heavy item you will incur a freight charge. We usually arrange for the kit to be shipped direct from our supplier to your premises to save double handling and any additional freight charges. Please contact your Rep or PACCON direct for more information.

# SPILL CLEANUP

PADS | BOOMS | ABSORBENT

## GREY GENERAL PURPOSE ABSORBENT PAD - 300GSM

General purpose pad colour coded grey for universal liquid spill absorption. Ideal for all liquid spills with the exception of aggressive acids or alkalis.

Dimensions: L:48cm x W:43cm.

**WSAPG300/10 - PACK OF 10 | WSAPG300/100 - PACK OF 100**

## WHITE OIL & FUEL ONLY ABSORBENT PAD - 300GSM

Oil & fuel only pad colour coded white for hydrocarbon spill absorption. Oil & fuel only absorbents take on board hydrocarbon liquids such as fuel, petrol, diesel, oil, solvents. Dimensions: L:48cm x W:43cm.

**WSASOPAD-10 - PACK OF 10 | WSASOPAD-100 - PACK OF 100**

## YELLOW HAZCHEM LIQUID ABSORBENT PAD - 300GSM

Hazchem pad colour coded yellow for hazchem liquid spill absorption. Designed for acids, alkalis, coolants, paints, oils and fuels. Made from inert material which will not react with any absorbed liquids. Dimensions: L:48cm x W:43cm.

**WSAPY300/10 - PACK OF 10 | WSAPY300/100 - PACK OF 100**

## GREY GENERAL PURPOSE BOOM

General purpose boom colour coded grey for universal liquid spill absorption. Ideal for all liquid spills with the exception of aggressive acids or alkalis.

**1.2 M - WSBG420 | 2.4 M - WSBG840**

## WHITE OIL & FUEL BOOM

Oil & fuel only boom colour coded white for hydrocarbon spill absorption. Additionally, they are designed to repel water making them ideal for oil & fuel spill recovery on either land or water.

**1.2 M - WSASOS1.2 | 2.4 M - WSASOS2.4**

## YELLOW HAZCHEM BOOM

Hazchem Boom colour coded yellow for Hazchem liquid spill absorption. Designed for acids, alkalis, coolants, paints and oils and fuels and are made from inert material which will not react with any absorbed liquids.

**1.2 M - WSBY420 | 2.4 M - WSBY840**

## PRATT GENERAL PURPOSE FLOOR SWEEP - 10KG

Highly absorbent, biodegradable, environmentally friendly materials. Rapidly encapsulates hydrocarbons (oils, fuels, grease etc) & many other liquids. Made of all natural, cellulose materials. No crystalline silica. Safe to use on all surfaces. (as FSGP contains natural fibres it may stain pale surfaces when mixed with liquid).

**WSFSGP30**

## INDUSTRIAL ORGANIC ABSORBENT

Industrial absorbent made from 100% renewable coir peat. Provides a safe and non-hazardous work site. Landfill and incinerator safe. Suitable for hazardous spills including oils, fuels, lubricants, paints, most chemicals and mild corrosives. 50 litre bag absorbs up to 26 litres of spilt material.

**WSGALSPL50LTR**

# SITE SAFETY

## DANGEROUS GOODS STORAGE

Pratt's range of cabinets are made for the safe storage of Class 3 flammable or combustible liquids and Class 4 chemicals in liquid or solid form as classified by the United Nations criteria and the ADG Code for dangerous goods. Their cabinets are constructed with your safety in mind and feature double steel walls and single, self closing, self-latching doors.

### CLASS 3 - FLAMMABLE LIQUIDS

These include flammable liquids such as paints, solvents, petrol, thinners, kerosene, turpentine, white spirits, alcohol and ethanol. Manufactured to standard AS1940.

**5517AS - 60 LITRE, 1 DOOR, 2 SHELVES | 5535AS - 100 LITRE, 2 DOORS, 1 SHELF**  
**5545AS - 250 LITRE, 2 DOORS, 3 SHELVES | 5560AS - 350 LITRE, 2 DOORS, 3 SHELVES**  
**OTHER SIZES AVAILABLE ON REQUEST**

### CLASS 4 DANGEROUS GOODS STORAGE CABINET

These include the following divisions:

**Flammable solids:** matches, nitrocellulose membrane filters, silicon powder, wetted explosives, sulphur, titanium powder (wetted), zinc resinate, naphthalene.

**Spontaneously combustible:** activated carbon, lithium alkyls, pentaborane, phosphorus, potassium sulphide - anhydrous, oily rags, seed cake, sodium sulphide - anhydrous, butyllithium.

**Dangerous when wet:** alkaline earth metal alloys, aluminium powder, barium, calcium hydride, calcium, calcium carbide, magnesium, lithium, sodium, sodium borohydride.

**5517AC4 - 60 LITRE, 1 DOOR, 2 SHELVES, | 5535AC4 - 100 LITRE, 2 DOORS, 1 SHELF,**  
**5545AC4 - 250 LITRE, 2 DOORS, 2 SHELVES | OTHER SIZES AVAILABLE ON REQUEST**

DANGEROUS GOODS STORAGE

**TOP  
SELLER**

### TRAFFIC CONES

High quality orange PVC. Single wide band of high intensity reflective tape, 900mm cone has two reflective bands. Meets AS/NZS 1906. 1:2007 standard.  
**450MM - TC450R | 700MM - TC700R  
 900MM - TC900R**

### COLLAPSIBLE TRAFFIC CONE

700mm or 900mm collapsible traffic cones. Removable LED beacon can fit inside or on top to illuminate the cone, HEAVY duty. Includes zipped carry bag and 2 AAA batteries. AS/NZS 1906. 1:2007  
**700MM - TC700CC | 900MM - TC900CC**

### BOLLARD

Extra tough 6kg rubber base + PVC bollard stem visibility. 240mm reflective tape complies to AS/NZS 1906.1:2007 standard.  
**WSBB6**

### DELINEATOR POST

Made of polypropylene, reboundable from any direction. 900mm high, 200mm base. Reflex Strips 2 x 150mm. Orange or yellow with a black base.  
**WDELINEATOR/O**

### 2.5M EXPANDABLE BARRIER

Light weight, sturdy and easy to use. Adjust the length according to the size you need up to 2.5 metres. Suitable for temporary construction, equipment maintenance, emergency barriers or to keep people out of a designated area. 950mm high. Other sizes available on request.  
**WSBARRICADE 2.5M Y/B**

### EXTENDER BAR

High quality PVC. Reflective yellow bands. Will fit any cone size. Retracts to 1200mm, extends to 2100mm.  
**TCEBR**

### BUNTING CORD FLAGS

Day/night, 30m of hi vis fluoro bunting PVC triangle flags.  
**WSBDN**

### BUNTING CORD FLAGS

Day only, 30m of hi vis fluoro bunting PVC triangle flags.  
**WSBDO**

### PLASTIC CHAIN

For cordoning off areas, signs can be attached. 24m roll or can be purchased by the metre.  
**WSPCRW1**

### FLOOR MARK TAPE

48mm x 30m, 125 microns thick. Durable self-adhesive tape.  
**WHFLOOR + COLOUR**

### CAUTION TAPE

100 metre roll x 75 mm width. Heavy duty plastic.  
**WCCAUTION**

### DANGER TAPE

100 metre roll x 75 mm width. Heavy duty plastic.  
**WCDANGER**

# SITE SAFETY

MATS | PROTECTORS

## SAFETY CUSHIONS

Natural or nitrile rubber compound and versatile, flow-through design combined to create an extremely popular all-purpose mat. Safety Cushion accommodates spills and debris, keeping employees safe and dry. Its lightweight form and moulded bevelled edging for trolley access makes the Safety Cushion a popular anti-fatigue mat for industrial and commercial areas.  
**WSSCB9060 - 900 x 600 | WSSCB9090 - 900 x 900 | WSSCB15090 - 1500x900**  
**ALSO SOLD BY THE METRE**

## AQUA TUBE MATTING

Duckboard design elevates workers above wet areas and allows water and fluid to easily drain off. Its tubular design is comfortable and compounded for mildew resistance. A perfect choice for wet areas. Hollow tubes give an "air cushion" effect, resulting in a reduction in user fatigue. Aqua Tube Matting insulates against cold & dampness, noise & electricity.

**BLUE, GREY, BLACK**  
**WSTT90R - 900 x 12m ROLL | WSTT120R - 1200 x 12m ROLL**  
**ALSO SOLD BY THE METRE**

## INTERLINK MAT

are made of a heavy duty natural rubber that offers excellent anti-fatigue characteristics in industrial and commercial work areas. If you need an irregular shape or larger size, let us make it for you. Interlink mats have a hidden interlocking system designed to connect all four sides making it perfect for covering large floor areas. For easy trolley access and extra employee safety, attach the 75mm wide safety bevelled edge.

**WSSZB9191 - 915 x 915 | WSILRF91 - YELLOW OR BLACK FEMALE RAMP**  
**WSILRM91 - YELLOW OR BLACK MALE RAMP**

## CABLE PROTECTOR

Superior protection for electrical cables, hydraulic & pneumatic hoses, data, video & signal lines. Made from Durathane - a proprietary cast moulded polyurethane. 900mm 550mm x 75mm. The channels are 65mm x 65mm, weighs 19kg.

**WDH-CP-4**  
**FREIGHT WILL APPLY**

## HOSE PROTECTOR

Ideal where you have large hoses or cables that need to be secured & protected. Rated to 20 tonne of pressure, 1010mm x 300mm x 135mm (high). Can be interlocked for extra length.

**WDH-HR-5**  
**FREIGHT WILL APPLY**

## PARKING BLOCK

Made from recycled rubber. The block conforms to any asphalt or concrete surface. Resistant to extreme temperature variations, UV light, oils, moisture & damage. The block can be used as a temporary or permanent fixture. 1830 mm x 150mm x 100mm (H), 2000 mm x 150mm x 100mm (H). (Fixing bolts need to be purchased separately, 4 bolts per block)

**WDH-PB-2 - 1.8 METRES | WDH-PB-3 - 2 METRES**  
**FREIGHT WILL APPLY**

*Master Lock products come in many variations and sizes. If you cannot see the product that meets your requirements here please contact your PACCON representative or PACCON Customer Services.*

**0410 ZENEX™ THERMOPLASTIC SAFETY PADLOCKS**

Designed exclusively for lockout/tagout applications, includes write on 'Danger' and 'Property of' labels. Can be “keyed-alike” to sets of any size, master keyed and/or registered to eliminate risk of key duplication. 38mm wide, 44mm tall. Available in red, orange, yellow, green, blue, black, purple and teal.  
**WLO0410 + COLOUR**

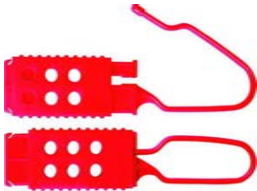

**HASP LOCKOUT**

The Master Lock No. 0420 Steel Safety Lockout Hasp features a 25mm inside jaw diameter and can hold up to six padlocks. Ideal for lockout by multiple workers at each lockout point. Control cannot be turned on until last worker’s padlock is removed from hasp. 44mm x 114mm with 25mm inside jaw diameter.  
**WLO0421 25MM DIAMETER JAW | WLO0421 38MM DIAMETER JAW**

**HASP NON-CONDUCTIVE NYLON**

The Master Lock No. 0428 Plastic Lockout Safety Hasp features spark proof, nylon material with a 64mm inside jaw diameter and can accommodate up to six padlocks. Ideal for lockout by multiple workers at each lockout point. Control cannot be turned on until last worker’s padlock is removed from hasp. 41 x 174mm jaw.  
**WSHASP NYLON**

**HASP SNAP-ON TAGOUT ALUMINIUM**

The Master Lock No. 0427 Labeled Red Safety Lockout Hasp features a 45 x 54mm diameter inside jaw and is designed to fit more lockout points than rivet-hinge lockout hasps. Anodised aluminum and stainless steel construction, includes hi vis write-on safety labels. 73 x 178mm, holds up to 5 safety padlocks.  
**WSHASP ALUM**

**CIRCUIT BREAKER LOCKOUTS**

Secure and simple mounting for a solid lockout. Grips tight with thumb turn and clamping handle, narrow profile permits side-by-side breaker lockout. Compact devices, easy to carry and easy to store.  
**WSCIRCUIT**

**LOCKOUT STATIONS**

Durable construction, upper and lower sections lockable. 16 hanger clips hold 2 padlocks or lockout hasps, moveable dividers, holes provided at bottom for optional peg hook hangers to hang large, bulky devices.  
**WSLOCKOUT**

**TAGS: DO NOT OPERATE**

Graphics fused into rugged industrial-grade polypropylene. Stands up to wash downs, humidity, and extreme temperatures. Use indoors or outdoors, resistance to over 30 chemicals. 76mm wide x 146mm high. 1 pack of 6 tags and ties.  
**WLS4002**

**TAGS: OUT OF SERVICE YELLOW/BLACK**

150x75mm Out Of Service tags. 200gsm material is water resistant and impervious to ripping, suitable for indoor and outdoor use, brass eyelet and string. Pack of 25.  
**WSTAGOOS 25/PKT**

**TAGS: LOCKOUT DO NOT OPERATE**

146mm high x 79mm wide heavy duty safety tags. 11mm diameter brass grommet accepts all safety padlocks, durable polyester laminate resists water, grease and extreme temperatures, 23kg of pullout force. Pack of 12 tags and 12 ties.  
**WSTAGLOCKOUT 12PKT**

**TAGS: INFORMATION BLUE/BLACK/WHITE**

150 x 75mm Information tags. 200gsm material is water resistant and impervious to ripping, suitable for indoor and outdoor use, brass eyelet and string. Pack of 25  
**WSTAGINFO**

# SIGNAGE

Under the Health & Safety at Work Act 2015 (+ its many amendments, codes & practices & regulations) all potential hazards must be eliminated, isolated or minimized. Having the correct compliant signage helps with hazard identification and minimization. Most signs convey the message by a pictogram (or image) and are of a certain colour depending on the potential hazard. Additional text may be added to help with understanding the signs intent. Currently there are four kinds of hazard signs as follows, the text and background colours are defined by the Health & Safety Act 2015.

<b>FIRE SIGNS</b> Indicates the location of fire fighting equipment & alarms and give instructions. <b>RED ON WHITE</b>	<b>WARNING SIGNS</b> Indicate immediate hazards exist or are present and instruct to exercise care. <b>BLACK ON YELLOW</b>	<b>MANDATORY SIGNS</b> Indicate an action that needs to be applied to an area and ensure work is carried out. <b>WHITE ON BLUE</b>	<b>EMERGENCY INFO</b> Indicate location of facilities such as exits, safety gear, first aid, defibrillators etc. <b>WHITE ON GREEN</b>
-------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------

PACCON can accommodate your signage requirements, below are examples of the most common signs. We can arrange for custom wording and dimensions, please be aware as we use an external provider there will be a wait for custom signs. Signage is printed on the media as follows:

- SELF-ADHESIVE** Applied directly to substrate, suitable for exterior use to clean, flat surfaces.
- CORFLUTE** Lightweight corrugated plastic board.
- ACM PANEL** Aluminium composite material, exterior use, UV stabilised - not magnetic.
- LUMINOUS** Glows in the dark.
- MAGNETIC** Flexible magnetic sheeting.
